TABLE FERN SEEDLINGS

HAVING TWELVE LARGE HOUSES especially constructed for the propagating of Ferns, and for their care during the early tender stages, I am enabled to produce a superior stock of young plants in large quantities.

Shipping season for seedlings commences in June and lasts till early fall.

Seedlings are generally shipped out of flats, packed damp around the roots in bunches of 25 each. When properly packed in this manner they travel any distance without the least injury, and express charges are slight comparing with shipments in flats, which seldom arrive in good condition.

My selection, comprising ten of the hardiest, most suitable varieties, for filling Dishes, and ornamental Pottery, in as near equal proportion as possible. Larger assortment upon request at no extra cost, if stock is available when your order reaches us.

Should stock be wanted for fillers for Poinsettias or other flowering plants, please advise, and suitable varieties for this purpose will be selected.

Strong clumps ready for potting, guaranteed to please or money back. \$5.00 per 100, \$44.00 per 1000. In the flats, if called for, \$5.00 per flat.
